

CAREER PROFILE

I am a working student who likes to learn as much about IT as possible.

So far I have about 3 years of part-time working experience, mostly gained in IBM. I have experience in server automation and (desktop) application development. I also enjoy taking part in volunteering and recruitment related activities.

EXPERIENCES

Server Lifecycle Automation Specialist, Applications Developer 2016 - Present
IBM, Czech Republic, Brno

My job is to ensure proper communication between two teams. One, which is installing environments for running proactive server automation and the other, which is setting policies for these environments afterwards. In the remainder of time I work as an application developer. I use python and IBM Watson to build new applications for internal usage.

Automation Engineer 2015 - 2016
IBM, Czech Republic, Brno

Developing and testing reactive automation for UNIX based operating systems deployed across the majority of IBM's customers in the EMEA-region. Main purpose of these solutions is to resolve problems on target devices without human interventions.

Automation Engineer 2015 - 2016
IBM, Netherlands, Amsterdam

Three months on Erasmus+ internship undertaken in IBM Netherlands. My tasks included development of reactive server automation, sharing my knowledge with my colleagues and learning basics of proactive server automation in RES automation suite.

Filip Boštík

IT specialist & Student

SKILLS & PROFICIENCY

Python

Beginner

Enthusiast - learning everything I can!

HTML & CSS

Beginner

I can debug, modify and build responsive CSS.

SQL

Beginner

I can write SQL queries and design structured databases.

JavaScript

Beginner

Been using it in order to create logical flow for automation.

Git

Beginner

Using it in smaller projects.

VBA

Advanced

Written a bachelor thesis in it.

Linux

Intermediate user

Using it everyday and I love it!

Project Management

Beginner

I understand principles and I already lead one small volunteering project.

Information Security Management System

Beginner

Received two certificates for theoretical knowledge:

'Information Security Management' from Petr Sedlák

'IS security branch management' from Petr Sedlák

Other skills: IBM Watson APIs, MS Office, LaTeX, RES Automation, IPCenter, Java, Bash, Windows, Information Systems overview.
